

Wireless Networked Gas Meter

This wireless networked gas meter is designed for accurate gas consumption measurement. It features real-time data transmission for remote monitoring and billing.

Overview

Smart Gas Measurement

The CG-FL-2.5 is a high-precision wireless networked gas meter engineered for seamless residential and commercial gas consumption monitoring. By integrating digital display technology with remote transmission capabilities, this device enables accurate billing and efficient resource management. Its dual-unit reporting functionality ensures comprehensive data visibility for modern energy infrastructure.

Technical Details

Model Number	CG-FL-2.5
Serial Number	03031031

Performance Metrics

Usage Tracking

4 m3 Total Consumption

Supported Flow Units	Nm3/h, kWh/h
----------------------	--------------

Features

Key Functionalities

- Wireless data transmission for remote monitoring
- High-accuracy digital metering
- Integrated mechanical counter backup
- LCD display for diagnostic communication
