

Wireless PIR Motion Sensor for Smart Home Security

This wireless PIR motion sensor is designed for smart home security systems. It features app-based control and connects to the internet via WiFi.

Product Overview

Smart Motion Detection Security

This wireless PIR motion sensor provides reliable security monitoring for smart home environments. It features advanced infrared detection technology that triggers immediate smartphone notifications the moment movement is identified. Designed for simplicity, the device operates wirelessly and integrates seamlessly with common smart home platforms for remote monitoring.

Technical Specifications

Connectivity	WiFi
Platform Compatibility	Tuya App
Installation	Cable-free / Wireless

Key Features

Core Features

- Real-time mobile push notifications
- Infrared motion detection
- Standalone WiFi module integration
- Low voltage indicator for battery maintenance
