Product Overview

Centralized Smart Security Control

This wireless alarm hub serves as the primary control unit for your smart home security ecosystem. It bridges local 433.92MHz sensors with your WiFi network, enabling remote management and real-time monitoring via smartphone applications. Designed for seamless indoor integration, it offers reliable connectivity and professional-grade security assurance.

Technical Specifications

Protection Class

IP20

Operational Voltage	230 V
Operating Frequency	2.4GHz WiFi / 433.92MHz Transmitter
Max Transmitter Range	25 m
Max Transmission Power	18.52 dBm

Operational Environment

Operating Temperature Range	0 - 35 °C
-----------------------------	-----------

Certifications & Standards

Certifications	CE, RED Certified, IEEE802.11b/g/n
----------------	------------------------------------
