

# Wireless Surveillance System with NVR

This wireless NVR kit includes a network video recorder and four wireless security cameras. It provides remote viewing and motion detection for comprehensive security.

## System Overview

### Professional Wireless Surveillance Solution

This high-definition 3MP wireless surveillance system provides a comprehensive security solution for both residential and commercial properties. Featuring a built-in dedicated WiFi module and H.265+ compression, the system ensures stable signal transmission while significantly optimizing storage space and network bandwidth. With integrated microphone support and real-time motion detection, it delivers reliable, synchronized monitoring that can be accessed remotely from any location via mobile or PC.

## Technical Specifications

### Ingress Protection

IP66

### Image Resolution

3 MP

### Video Compression

H.265+

## Features

### Connectivity

- Built-in wireless network card
- Dedicated security WiFi module
- Wireless signal stability
- Strong anti-interference design

### Smart Features

Motion Detection, Real-time Alerts, Two-way Sync, Remote Access
