

Wireless Video Smart Doorbell with Remote Monitoring

This wireless video doorbell enhances home security by providing a clear view of visitors. It features motion detection, two-way audio, and smartphone app connectivity for remote monitoring.

Overview

Smart Security Solution

This wireless video doorbell provides robust home security with high-resolution video capture and reliable motion detection. Designed for seamless remote monitoring, it enables real-time two-way audio communication directly through a smartphone application. The system includes a dedicated chime unit to ensure immediate audible notifications inside the home.
