

Wiring Harness for Heater and Heat Exchange Systems

This wiring harness is designed for heater and heat exchange systems. It features multiple wires of varying colors and gauges, terminated with various connectors.

Product Overview

Professional Wiring Harness

This wiring harness is specifically engineered for heater and heat exchange systems, providing a reliable electrical connection solution. Designed for use in general machinery and industrial applications, the assembly features organized, color-coded wiring of varying gauges. Secured with durable plastic ties, this harness ensures clean installation and prevents tangling in complex industrial environments.

Technical Specifications

Construction Features

- Multi-gauge wiring
- Color-coded conductors
- Pre-terminated connectors
- Secured with industrial plastic ties

Primary Application	Heater and Heat Exchange Systems
Industry Category	General Machinery, Industrial Parts, HVAC Components
