

Wood Auger Drill Bit

This wood auger drill bit is designed for efficient wood drilling. Its screw point tip allows for self-starting and easy pulling through the wood, while the spiral flutes ensure the efficient removal of wood chips.

Product Overview

Professional Wood Auger Drill Bit

This high-performance auger drill bit is engineered for precision drilling in various wood types, including soft wood, hard wood, chipboard, and plywood. Featuring a high carbon steel construction, it offers excellent durability and consistent performance for demanding woodworking tasks. The integrated self-feeding screw point ensures efficient, clean penetration and controlled drilling speed.

Technical Details

Available Lengths

- 235
- 400
- 460

Material Composition	High Carbon Steel (65#)
Shank Diameter	5/8 inch
Key Features	Self-feeding screw point, Spiral flute design, High carbon steel

Application

Compatible Materials	Soft Wood, Hard Wood, Chipboard, Plywood
