Product Overview

High-Performance Wood Auger Bit

This wood auger drill bit is engineered for precision and efficiency in demanding woodworking applications. Featuring a high carbon steel construction and a threaded center point, it ensures accurate hole location and rapid, self-starting performance. Designed for compatibility with both hex and SDS-plus shanks, this bit delivers clean, consistent results in soft and hard woods, plywood, and large section beams.

Technical Specifications

Material	High Carbon Steel
Diameter	10 mm
Overall Length	230 mm
Shank Diameter	13 mm
Available Shank Types	Hex Shank, SDS-plus Shank

Design Features

Key Features

- Threaded center point for precise locating
- Fast self-starting hole capability
- Spiral flute design for efficient chip removal
- Suitable for soft and hard wood

Applications

Compatible Materials

Soft Wood • Hard Wood • Large Section Beams • Chipboard • Plywood
