

Wood Auger Drill Bit

This auger bit is designed for drilling clean, precise holes in wood. It features a self-feeding screw point for effortless drilling and optimized flute geometry for efficient chip removal.

Product Overview

High-Performance Woodworking

This high-performance auger bit is engineered for drilling clean, precise holes in various types of wood. It features a specialized self-feeding screw point that allows for effortless penetration and consistent drilling depth. With optimized flute geometry, the bit ensures efficient chip removal, resulting in smoother, more accurate woodworking operations.

Technical Features

Key Design Features

- Self-feeding screw point
- Optimized flute geometry
- Designed for clean and precise holes
- Efficient chip removal

Application

Ideal Applications

Woodworking, Carpentry, Furniture Making, Construction
