Product Overview

High-Performance Wood Cutting Blades

These professional-grade circular saw blades are engineered for precision and durability in woodworking applications. Designed to be compatible with various angle grinders and cutters, they deliver smooth and accurate cuts across a wide range of materials including solid wood, plywood, and MDF. With options ranging from 105mm to 500mm, these blades are optimized for consistent performance across different rotary speeds and workload requirements.

Technical Specifications

Key Performance Metrics

120 T Max Tooth Count	8000 rpm Max Rotary Speed	500 mm Max Outer Diameter
