

Wood Jointer with Dust Collection

This wood jointer is designed for flattening and straightening the edges and faces of boards. It features an integrated dust collection port to efficiently remove wood chips and dust.

Product Overview

Precision Woodworking Performance

This 6-inch jointer is a robust woodworking machine engineered for flattening and straightening the faces and edges of boards. It features a reliable cutterhead system for smooth, clean cuts and an adjustable fence to support beveling and chamfering operations. With an integrated dust collection port, it ensures a cleaner, safer workspace, making it a versatile tool for both professional and hobbyist woodshops.
