Product Overview

Precision Wood Turning Lathe

This versatile wood lathe is designed for precision shaping, allowing both hobbyists and professional woodworkers to create intricate spindles, bowls, and turned objects. Featuring robust construction and a powerful motor, it ensures stability and efficient operation for various wood projects. With an integrated digital speed display and variable speed control, users can achieve optimal performance and smooth finishes on every workpiece.

Technical Specifications

Rated Power

550 W

Motor Power

Voltage/Frequency 230V / 50Hz

Machine Weight 31 kg

Model Identifier MCW12

Features & Safety

Core Features

- Variable speed control
- Digital speed display
- Adjustable tool rest
- Adjustable tailstock

Safety Guidelines

- Read owner's manual before use
- Wear eye protection
- Keep hands clear of moving parts
- Disconnect power before servicing

Certifications

CE
