

Wood Mortising Machine

This mortising machine is designed for woodworking applications, providing accurate and efficient mortise cutting. It features a robust frame, precision controls, and a powerful motor for creating strong and durable joints.

Overview

Professional Wood Mortising Machine

This heavy-duty mortising machine is engineered for high-precision woodworking applications, making it an essential tool for creating strong, durable joints in furniture and cabinetry. Built with a robust frame and adjustable work-holding systems, it ensures stability and accuracy during operation. It is designed to deliver consistent, reliable performance for both professional workshops and serious hobbyists.

Technical Specifications

Motor Speed (50Hz)	1400 RPM
Motor Speed (60Hz)	1720 RPM
Model Identifiers	QNR, TOOL, ST1005

Key Features

Capabilities

- Robust frame construction
- Precision control system
- Adjustable fences for workpiece positioning
- Integrated workpiece hold-downs
- Universal chuck for various chisel sizes
