

Wood Planing Machinery

This woodworking machinery is designed for planing and surface finishing of wood. It features a robust construction, adjustable fence, and safety controls.

General Overview

Precision Wood Planing Excellence

The MB504B wood planing machine is engineered for high-precision surface finishing and dimensioning in professional woodworking environments. Built with a robust frame to ensure stability, it delivers consistent results even under continuous industrial operation. The integrated safety features and adjustable controls make it an essential tool for workshops aiming to achieve professional-grade lumber surface quality.

Technical Specifications

Model Identifier	MB504B
Applications	Professional Woodworking, Industrial Use, Surface Finishing

Design and Safety

Safety Features

Emergency Safety Controls • Adjustable Fence • Robust Construction
