

Wood Router Bit with Edge Profiles

This router bit is designed for woodworking applications. It can create decorative edges and profiles on wood pieces with precision.

Product Overview

Precision Woodworking Edge Profiles

This versatile wood router bit is engineered for high-precision woodworking, specifically designed for crafting intricate decorative edges. Featuring an integrated bearing guide, it ensures smooth operation and consistent results across various profiles including Roman Ogee, Ogee, Beveled, and Classical. It is an essential tool for professional woodworkers aiming to achieve clean, professional-grade finishes on wood projects.

Technical Specifications

Design Features

- Integrated bearing guide for smooth operation
- Designed for decorative edge profiling
- Precision-engineered cutting geometry

Application

Woodworking • Decorative Edging • Professional Use

Supported Edge Profiles

Roman Ogee, Ogee, Beveled, Classical
