

# Wood Splitting Maul Axe

This heavy-duty maul axe is designed for splitting wood with ease. It features a durable head and a long handle for increased leverage and a comfortable grip.

## ADDITIONAL IMAGES

## Product Overview

### Professional Wood Splitting Maul

This heavy-duty maul axe is engineered for efficient wood splitting and log processing. Constructed from high-quality C45 carbon steel, the head undergoes a rigorous forging and multi-stage finishing process including quenching and burnishing. Designed for both professional forestry and landscaping applications, this tool ensures durability and reliable performance in demanding environments.

## Technical Specifications

### Manufacturing Process

- Forging in mold
- Kibbling
- Quenching
- Burnishing
