

Wood Splitting Maul with Long Handle

This wood splitting maul is designed for splitting wood. It features a heavy, wedge-shaped head made of steel, attached to a long wooden handle for leverage.

Product Overview

Heavy-Duty Wood Splitting Maul

This professional-grade wood splitting maul is engineered for high-efficiency log processing in forestry and woodworking environments. Featuring a robust, wedge-shaped steel head and an extended handle, it is designed to maximize leverage and impact force. The tool's durable construction ensures longevity and reliable performance during demanding, heavy-duty splitting tasks.

Technical Specifications

Durability Features

Rust-resistant coating • Heavy-duty construction • Long handle leverage

Head Material	Steel
Handle Material	Wood
Head Design	Wedge-shaped
Primary Application	Forestry, Woodworking, Log Splitting
