

Wood Turning Lathe

The Wood Turning Lathe is a precision woodworking machine designed for turning wood stock into various shapes and designs. It features adjustable headstock and tailstock centers to accommodate different workpiece lengths.

Product Overview

Professional Benchtop Turning Solution

This high-performance benchtop wood lathe is designed for versatility and precision in various wood turning projects. Featuring a robust cast iron construction and nonslip rubber feet, it effectively minimizes vibration during operation. With five adjustable speed settings, it offers the flexibility needed for both hobbyists and professional woodworkers to achieve accurate results.
