

Wood Turning Lathe

This wood lathe shapes wood by rotating a workpiece against cutting tools. It features a sturdy base, headstock, tailstock, and tool rest for creating spindles, bowls, and other turned objects.

Product Overview

Professional Grade Wood Turning Lathe

This wood turning lathe is a versatile machine tool engineered for precision shaping of wood workpieces. Featuring a robust green base and a stable headstock-to-tailstock configuration, it provides the reliability needed for creating spindles, bowls, and intricate turned objects. It is an ideal addition to workshops requiring durable equipment for diverse woodturning operations.

Machine Configuration

Primary Assembly Components

- Headstock with motor and controls
- Adjustable tailstock
- Tool rest
- Sturdy base frame

Safety and Compliance

Operating Best Practices

Category	Guideline
Setup	Read entire owner's manual before assembly
Environment	Keep work area clean and visitors away
Maintenance	Maintain tools with care and keep guards in place
Operation	Do not force tool; give work undivided attention

Operator Safety Guidelines

Eye Protection Required, Manual Required, Guard Compliance, Proper Dress Code
