

Woodworking Back Saw with Stiff Spine

This back saw is designed for woodworking, featuring a thin blade and a rigid spine for stability. It enables precise and controlled cuts, making it suitable for tasks like cutting dovetails and tenons.

Product Overview

Precision Woodworking Back Saw

This professional-grade back saw is engineered for high-precision woodworking tasks, including cutting dovetails and tenons. Featuring a high-carbon steel blade with a rigid spine, it ensures maximum stability and prevents blade buckling during operation. The ergonomic handle design provides superior control, making it an essential tool for both enthusiasts and professional joiners.

Technical Specifications

Model Number	DT1901
Blade Material	High-carbon steel
Cutting Action	Push stroke

Key Features

Ideal Applications

- Dovetail cutting
- Tenon cutting
- Fine joinery
- General woodworking

Key Features	Rigid Spine, Ergonomic Handle, High-Carbon Steel, Precision Joinery
