

Woodworking Jointer Machine

This woodworking jointer is designed for precision surfacing and edge jointing of wood. It features a robust cast iron construction for stability and accurate cuts.

Overview

Professional Woodworking Jointer

The MB524 heavy-duty jointer is engineered for precision surfacing and edge jointing in demanding woodworking environments. Constructed with robust cast iron, it provides exceptional stability and vibration dampening for consistent, high-quality results. Featuring adjustable infeed and outfeed tables and a specialized cutterhead, this machine ensures accurate depth control and smooth surface finishes for every project.

Key Features

Model Number	MB524
Material Composition	Cast Iron, Heavy-duty Steel

Performance

Primary Functions

- Precision Surface Planing
- Edge Jointing
- Vibration-dampened Operation

Safety Certifications

Integrated Guarding • Operator Protection
