

Woodworking Jointer Planer

This woodworking planer, also known as a jointer, produces a flat surface along a board's length. It features a rotating cutterhead with multiple blades that remove material as the wood is passed over it.

Product Overview

Professional Woodworking Jointer Planer

This woodworking jointer planer is a professional-grade machine tool designed to create perfectly flat surfaces along the length of wood boards. It features a high-performance rotating cutterhead equipped with multiple precision blades that ensure smooth material removal. Built for stability and ease of use, the unit includes adjustable infeed and outfeed tables for precise depth control, integrated with a sturdy fence to maintain straight cuts.

Technical Features

Core Features	Adjustable Infeed Table, Adjustable Outfeed Table, Precision Fence, Rotating Cutterhead
Mounting Type	Standalone floor stand

Operational Metrics

Cutting Method	Rotating cutterhead with multi-blade assembly
