

# Woodworking Lathe

This woodworking lathe is a precision machine engineered for shaping wood. Its robust frame ensures stability, while the variable speed motor and adjustable tool rest provide optimal control and accurate cuts.

## Overview

### Precision Woodworking Capability

The MC613B woodworking lathe is a precision machine engineered for shaping wood with high accuracy. It features a robust frame for stability, a variable speed motor for optimal control, and an adjustable tool rest for precise cuts. This lathe offers the versatility and durability required for a wide range of woodworking projects, making it suitable for both professional workshops and advanced hobbyists.

## Technical Specifications

Model Number	MC613B
Machine Type	Woodworking Lathe

## Key Features

### Core Features

- Robust frame for vibration-free operation
- Variable speed motor control
- Adjustable tool rest for accuracy

Application Suitability	Professional Woodworking, Hobbyist Projects, Precision Shaping
