Product Overview

Professional Woodworking Milling Machine

This robust milling machine is engineered for precision woodworking tasks including edge trimming, leveling, and slot milling. It features a powerful motor designed for smooth, efficient cutting performance across various wood materials. With adjustable depth settings and ergonomic handles, this tool provides the stability and control required for intricate designs and clean finishing work.

Technical Specifications

Key Features

- Adjustable depth control
- Powerful motor for smooth cutting
- Sturdy base for stability
- Ergonomic handles for control

Primary Applications

Edge Trimming, Leveling, Slot Milling, Routing, Shaping

Depth Adjustment

Yes
