

Woodworking Shaping and Cutting Machine

This woodworking machine is designed for precision and efficiency in woodworking operations. It features a robust frame, a large working table, and a powerful cutting mechanism.

Overview

Professional Woodworking Capability

This woodworking shaping and cutting machine is engineered for precision, efficiency, and consistent performance in demanding workshop environments. It features a robust frame construction and a spacious working table designed to handle a variety of woodworking tasks, including complex cutting, shaping, and profiling. Safety and usability are prioritized through an integrated safety guard and an intuitive foot pedal system for streamlined operational control.

Key Features

Primary Functions

- Precision cutting
- Wood shaping
- Surface profiling

Control Features

Foot pedal operation, Adjustable control panel, Safety guard protection

Technical Specifications

Construction

Robust metal frame • Large format worktable
