

Woodworking Tool Sharpening Machine with Water Cooling

This woodworking machine features a grinding wheel and a specialized jig for accurate sharpening. It includes a water cooling system to prevent overheating during operation and allows for controlled angles and consistent results.

Product Overview

Precision Tool Sharpening Performance

This woodworking tool sharpening machine is engineered for high-accuracy grinding and shaping of various cutting tools. Featuring an integrated water cooling system, it effectively prevents overheating to preserve the integrity and temper of your blades. The included adjustable jig system allows professional users to achieve precise, consistent sharpening angles with ease.

Technical Details

Model Number	MF206
Cooling System	Water Cooling

Features

Key Capabilities

- Integrated water cooling to prevent overheating
- Adjustable sharpening jig for precise angle control
- Versatile grinding wheel for shaping and honing
- Suitable for both professional and hobbyist applications

Certification and Compliance

Country of Origin	China
