

Wool Felt Buffing Wheel

Wool felt buffing wheels are used for polishing and finishing materials. They are ideal for achieving high-luster finishes on metals, plastics, and other surfaces when paired with polishing compounds.

Product Overview

High-Density Wool Felt Buffing Solution

These professional-grade wool felt buffing wheels are engineered for high-precision polishing and finishing tasks. Compatible with various polishing compounds, they enable operators to achieve a superior high-luster finish on a wide range of materials, including metals and plastics. The product range offers versatile options including mounted points for detailed work and multiple wheel sizes for standard applications.

Technical Specifications

Key Features

- High-density felt construction for durability
- Includes varied wheel sizes and shapes
- Mounted points included for intricate detailing
- Optimized for use with polishing compounds

Material	High-density wool felt
Suitable Materials	Metals, Plastics, General Surfaces
