

Work Gloves with Knit Wrist and Reinforced Palm

These work gloves offer durability and protection in various work environments. The reinforced palm provides enhanced grip and resistance to wear and tear, making them suitable for heavy-duty tasks.

Product Overview

Built for Durability and Protection

These work gloves are engineered to provide maximum durability and protection across a wide range of industrial and manual work environments. Featuring a reinforced palm for superior grip and wear resistance, they are built to withstand heavy-duty tasks. The integrated knit wrist design ensures a secure, snug fit while effectively keeping debris and dust out of the glove.
