

Worm Drive Hose Clamp

This worm drive hose clamp is constructed from durable metal. It features a slotted screw for tightening and a perforated band for secure fastening.

Product Overview

Professional Grade Worm Drive Hose Clamp

This high-quality worm drive hose clamp is engineered for secure and reliable fastening in demanding environments. Featuring a durable metal construction with a precision-slotted screw mechanism, it allows for easy tightening and fine-tuned adjustments. Its perforated band design ensures a tight, consistent grip, making it an essential component for automotive, plumbing, and various industrial hose and tubing applications.

Technical Specifications

Material	Durable Metal
Mechanism	Worm Drive with Slotted Screw
Design Features	Perforated Band, Adjustable, Corrosion Resistant

Applications

Suitable Industries

- Automotive
- Plumbing
- General Industrial
