

Worm Gear Speed Reducer

This worm gear speed reducer is designed for efficient speed reduction and torque multiplication. The robust housing ensures durability and protection of internal components in various machinery and equipment.

Product Overview

Industrial Precision Engineering

This worm gear speed reducer is designed to provide efficient speed reduction and high-torque output for a wide range of industrial machinery. Built with a robust housing to ensure durability and protection of critical internal components, it is an essential solution for applications requiring precise speed control. The unit is optimized for reliability in demanding operational environments.

Technical Specifications

Model Series	FCO-WPO
Available Gearbox Types	Worm Gear, Helical Gear, Worm Helical Gear, Speed Variator, Cyclo-Drive

Components and Accessories

Compatible Equipment

- Couplings
- Door Operators
- Gate Operators
