

Worm Gear Speed Reducer

This worm gear speed reducer is designed for industrial applications requiring speed reduction and increased torque. The reducer features a durable housing and is suitable for heavy-duty use in various mechanical systems.

Product Overview

Industrial Worm Gear Speed Reducer

This robust worm gear speed reducer is engineered for reliable industrial power transmission. Featuring a durable cast iron housing, it is designed to effectively reduce input speeds while significantly increasing torque in mechanical systems. Its compact, heavy-duty construction ensures longevity and efficient performance across a variety of demanding industrial applications.

Technical Specifications

Gearbox Configuration	Worm Gear
Housing Material	Cast Iron
Primary Applications	Speed Reduction, Torque Multiplication, Industrial Machinery

Product Compatibility

Supported Gearbox Variants

- Worm gear speed reducer
- Helical gear speed reducer
- Worm helical gear speed reducer
- Speed variator
- Cyclo-drive gearboxes

Compatible Accessories

- Couplings
- Door operators
- Gate operators
