

Worm Gearbox Speed Reducer

This worm gearbox provides efficient speed reduction and high torque transmission. Its robust construction ensures durability and reliable performance in demanding environments.

Product Overview

Durable housing design optimized for heat dissipation and rigidity.

High-Performance Worm Gearbox

This industrial-grade worm gearbox is engineered for precise speed reduction and high torque transmission. Designed with robust housing and precision-machined gears, it offers excellent heat dissipation and reliable operation in demanding environments. It is an ideal solution for integration into medical, pharmaceutical, and general industrial machinery requiring smooth motion control.

Technical Specifications

RV040 series gearbox showing standard industrial mounting interface.

Frame Sizes

- 025
- 030
- 040
- 050
- 063
- 075
- 090
- 110
- 130
- 150

Available Ratios

- 5
- 7.5
- 10
- 15
- 20
- 25
- 30
- 40
- 50
- 60
- 80
- 100

Mounting Positions

B3 • B8 • B6 • B7 • V5 • V6

Available Types

RV, NRV, RV-E, NRV-E

Input Configuration

IEC Flange or Custom configuration
