

WQ Submersible Sewage Pump

This submersible sewage pump is designed for efficient wastewater and sewage handling. Its robust construction ensures durability in demanding environments.

Product Overview

Professional Submersible Sewage Pump

This submersible sewage pump is engineered for heavy-duty wastewater and sewage handling in challenging environments. Built with a robust motor and high-quality corrosion-resistant materials, it ensures long-term operational reliability. The integrated non-clog impeller design prevents frequent maintenance, making it an ideal solution for municipal treatment, industrial effluent management, and agricultural irrigation applications.

Technical Features

Impeller Design	Non-clog
Construction Materials	Corrosion-resistant

Applications

Primary Applications

- Municipal wastewater treatment
- Industrial effluent management
- Agricultural irrigation
