Product Overview

Professional Submersible Sewage Pump

The WQDY/WQY series is a high-performance submersible pump engineered for professional industrial and municipal use. Featuring a robust motor and specialized down-pump structure, it efficiently handles sewage, dirty water, and chemically corrosive media. Designed for versatility, this pump is an essential tool for construction, agricultural irrigation, and environmental protection projects.

Key Features

Key Features

Automatic Float Switch, Thermal Overload Protection, Corrosion Resistant, High Flow Rate, Down-Pump Structure

Technical Specifications

Build Materials

- Stainless Steel
- Cast Iron
- Durable Plastic

Motor Type

Single-phase and Three-phase Asynchronous

Applications

Recommended Use Cases

- Municipal sewage treatment
- Construction site drainage
- Agricultural irrigation
- Industrial waste transfer
- River and pond dredging
- Chemical industry effluent transport
