

Wrapped V-Belts for Mowers and Agricultural Equipment

Wrapped V-belts are suited for demanding drives in agricultural machinery. The belts are constructed with high-strength tension cords and offer excellent resistance to heat, oil, and abrasion.

Product Overview

High-Performance Wrapped V-Belts

These wrapped V-belts are engineered specifically for the rigorous demands of agricultural machinery and mower applications. Constructed with high-strength tension cords, they offer superior resistance to heat, oil, and abrasion, ensuring reliable power transmission in challenging environments. The reinforced design prevents stretching, maintaining consistent performance and smooth operation even under heavy, continuous loads.

Technical Specifications

Common Part Identifiers

- TIA10-1720
- 11X10-1120
- 11810.11.20
- B-40

Belt Construction

Wrapped V-Belt

Key Features

Heat Resistant, Oil Resistant, Abrasion Resistant, High-Strength Tension Cords, Anti-Stretch Design

Application

Suitable Applications

Mowers • Agricultural Equipment • Heavy-Duty Drives
