

Wrist Blood Pressure Monitor

This is a compact wrist blood pressure monitor for taking convenient and accurate measurements. It features an easy-to-use interface and stores previous readings for tracking blood pressure trends.

Overview

Compact Wrist Monitoring

This wrist blood pressure monitor is engineered for portability and ease of use, making it an ideal solution for regular health tracking. The device features a clear digital display that provides immediate readings for systolic and diastolic pressure, along with pulse rate. With automatic inflation and deflation technology, it ensures a comfortable and efficient measurement experience for users on the go.

Technical Specifications

Supported Units

- mmHg
- kPa

Measurements
