

Wrought Steel Tee Fitting ASTM A420 WPL6

This tee fitting is made from ASTM A420 Grade WPL6 material. It is designed with one inlet and two outlets to either combine or split fluid flow.

Product Overview

Wrought Steel Tee Fitting

The Wrought Steel Tee Fitting in ASTM A420 WPL6 is a high-performance piping component engineered for low-temperature service environments. Designed with a three-way configuration for splitting or combining fluid flow, it offers superior weldability and impact resistance. This durable fitting is ideal for industrial piping systems that demand high strength and structural integrity under pressure.

Technical Specifications

Material Grade	ASTM A420 WPL6
Connection Type	Butt-Weld (BW)
Standards Compliance	ASTM A420, ANSI B16.9, MSS SP-75

Service & Warranty

Warranty

2 Years
Warranty Period

Maintenance	Low maintenance
