

XA375B Sewage Pump for Wastewater and Sewage Removal

The XA375B sewage pump is designed for efficient and effective removal of solids and liquids. Its construction incorporates high-quality materials to withstand harsh environments and prolonged use.

Product Overview

Professional Sewage Management

The XA375B sewage pump is a robust solution engineered for the efficient removal of wastewater and sewage in diverse environments. Built for durability, it effectively handles both solids and liquids to ensure long-term, reliable performance in demanding settings. This versatile unit is suitable for a wide range of applications, including residential, commercial, and industrial wastewater management.

Key Features

Build Quality

Heavy Duty • High-Quality Materials

Suitable Environments

Residential, Commercial, Industrial

Operational Capabilities

System Capability

- Wastewater removal
- Sewage handling
- Solid matter processing
- Liquid transfer
