

XG31802 Motor Grader

The XG31802 grader is designed for road construction, maintenance, and grading applications. It features a hydraulic system for precise blade control and an ergonomic operator cabin for enhanced productivity.

Overview

XG31802 Motor Grader

The XG31802 is a robust and versatile motor grader engineered for demanding road construction and maintenance tasks. It features a powerful engine that delivers high torque and horsepower, ensuring consistent performance in challenging conditions. The advanced hydraulic system provides precise control over the blade, while the ergonomically designed cabin prioritizes operator comfort and visibility to maximize productivity.

Key Features

Design Highlights

Ergonomic Cabin • High Visibility • Durable Construction

Included Attachments

Moldboard, Scarifier, Ripper

Applications

Primary Applications

- Road construction
- Road maintenance
- Soil grading
