

Y-Axis Timing Belt for Fuji XP143/XP243 SMT Machines

This timing belt is designed for the Y-axis drive system of Fuji XP143 and XP243 SMT machines. It ensures reliable and accurate component placement in surface mount technology applications.

Product Overview

High-Precision Y-Axis Timing Belt

This high-precision timing belt is specifically engineered for the Y-axis drive system of Fuji XP143 and XP243 SMT machines. Manufactured to exacting standards, it ensures reliable and accurate component placement through a precise tooth profile designed for synchronous motion. The belt features durable construction with high resistance to wear and stretching, providing consistent performance in demanding surface mount technology applications.

Technical Specifications

Condition

Original New

Part Number

H4519T

Belt Specification

460-5GT

Compatible Machines

Fuji XP143, Fuji XP243

Origin

Japan
