

Y-Pattern Brass Debris Strainer

This Y-pattern brass strainer is designed for filtering debris from fluid systems. Constructed from durable brass, it features a threaded connection and a removable screen for cleaning.

Product Overview

Y-Pattern Brass Debris Strainer

This Y-pattern brass strainer is engineered for efficient debris filtration in fluid systems, protecting pumps, meters, and sensitive equipment from particulate damage. Its durable brass construction ensures long-term reliability in various plumbing, HVAC, and industrial applications. The Y-shape design allows for seamless inline installation, while the removable screen facilitates convenient maintenance and cleaning.

Technical Specifications

Material

Brass

Specification Range

0.375-2 inch

Compliance Standard

GB Standard

Design

Y-Pattern

Key Features

Product Highlights

- Durable brass construction
- Y-pattern inline design
- Removable screen for easy cleaning
- Threaded connection type
- Protects sensitive downstream equipment
