

Y-Strainer

This Y-strainer is designed for removing unwanted solids from liquid, gas, or steam lines. It features a removable screen accessible through a bolted cap, simplifying maintenance and replacement.

Product Overview

Industrial Y-Strainer Protection

This Y-strainer is engineered to efficiently remove unwanted solids from liquid, gas, or steam lines, ensuring the longevity of your downstream equipment. Featuring a robust body construction and flanged connections, it is designed for straightforward installation and maintenance in demanding industrial environments. The accessible filter element allows for periodic cleaning, providing reliable protection for pumps, meters, and other sensitive components against debris-related damage.

Technical Specifications

Maintenance Features

- Removable screen/filter element
- Bolted or threaded access cap
- Easy cleaning and replacement

|------------------------|------------------|
| Construction Materials | Cast Iron, Steel |
| Connection Type | Flanged |
| Pressure Class | 150 |

Applications

Protected Equipment

Pumps • Meters • Sensitive Equipment

Compatible Media

- Liquid
- Gas
- Steam
