

Yamaha FS Feeder for SMT Pick and Place Machines

This Yamaha FS feeder is compatible with SMT pick and place machines. It is designed for efficient and reliable component feeding in automated assembly processes, supporting 8X2 and 8X4 component sizes.

Product Overview

Precision Yamaha-Compatible SMT Feeders

These professional-grade SMT feeders are engineered for high-precision component delivery in automated pick and place assembly lines. Designed for compatibility with various Yamaha series machines, they support both pneumatic and electric feeding modes for maximum operational flexibility. Built with high-durability materials including industrial-grade plastics and aluminium alloys, these feeders ensure consistent feeding accuracy and reduced downtime in high-volume manufacturing environments.

Compatibility & Technical Data

Feeder Specifications Table

Part Number	Size	Mode	Series
KW1-M1500-030	8x2 0201	Pneumatic	YV/YG
KW1-M1300-00X	8x2 0402	Pneumatic	YV/YG
KW1-M1100-000	8x4mm	Pneumatic	YV/YG
KJK-M1300-012	8x2 0402	Pneumatic	YG12/YG12F
KHJ-MC100-001	8mm	Electric	YS12/YS24

Drive Mechanisms

Pneumatic, Electric

Design & Materials

Body Materials

- Industrial Plastic
- Aluminium Alloy
