

YAMAHA SMT Equipment SZ Belt

This SZ belt is designed for YAMAHA SMT equipment. It ensures optimal performance and reliability in surface mount technology (SMT) assembly processes.

Product Overview

High-Performance SMT Drive Belt

This original SZ belt is engineered for precision and reliability in YAMAHA SMT assembly equipment. Designed to meet stringent quality standards, it ensures consistent power transmission and operational longevity in high-speed surface mount technology processes. The component is compatible with various feeder and machine configurations, making it a critical spare for maintenance and system repair.

Technical Details

Component Type

SZ Belt • Drive Component • SMT Spare Part

| | |
|-------------------|---------------|
| Part Number | KW3-M2211-00X |
| Country of Origin | Japan |

Compatibility

Supported Machine Series

- YVP-XGYVP
- YV100II
- YV100X
- YV100XT
- YV100XTG
- YG200
- YG200L
- YG100
- 88X/88XG

Additional Compatible Parts Reference

| Part Reference | Description/Application |
|----------------|-------------------------|
| KM1-M7138-00X | Belt Head/YV100II R |
| KV7-M9129-00X | Belt 1, Conveyor |
| KG7-M9115-00X | Belt, W Axis |
| KGB-M7181-00X | Belt, Head |
| KV8-M7137-00X | Belt, R Motor |
