

YAMAHA SMT Nozzle Shaft Assembly

This nozzle shaft assembly is designed for YAMAHA SMT equipment. It ensures accurate and reliable component placement during the SMT process.

Product Overview

Precision Nozzle Shaft Assembly

This high-precision nozzle shaft assembly is engineered for demanding surface mount technology applications. Designed for seamless integration and reliable performance, it ensures accurate component placement during the assembly process. Built with robust materials for extended operational lifespan, this component meets critical industry standards for SMT equipment maintenance.

Technical Details

Condition

Original • New

Primary Part Number	KG7-M7173-A0X
---------------------	---------------

Cross-Reference P/N	5322 256 92337
---------------------	----------------

Compatibility

Compatible Machine Series	YVL88II
---------------------------	---------

Supported Spare Parts

Related SMT Components

Component Name	Part Number
Valve Kit	KU0-M3410-41X
Air Joint	KG2-M3407-A0X
Sensor S Assy	KG9-M3455-11X
Sensor, R	KH5-M3456-A0X
AC Servo Motor	90K55-87134X
Ejector	KM0-M7182-00X
Valve Sub Assy	KG7-M7188-00X
