

YAMAHA YV100X SMT Nozzle Shaft

This is a nozzle shaft designed for YAMAHA YV100X SMT pick-and-place machines. It ensures accurate and reliable component placement.

Product Overview

Precision Nozzle Shaft for SMT Assembly

This high-precision nozzle shaft is designed specifically for integration into professional surface mount technology (SMT) machinery. Built for reliability and long-term performance, it serves as a critical component for maintaining consistent pick-and-place accuracy in high-speed assembly environments. This genuine component is manufactured to meet rigorous quality standards for industrial electronics manufacturing.

Technical Details

Condition

New • Original

Part Number

KV8-M7106-704

Country of Origin

Japan

Compatibility Information

Related Components

- Mother Board Assy
- Servo Board Assy
- System Unit Assy
- Driver Board Assy
- Vision Board Assy
- Interface Board Assy
- D. Power Board Assy
- Flash Board Assy

Compatible Series

YV100X, YG200, YS24
