

YAMAHA YV88X SMT Placement Nozzle

KV7-M7710-A1X

This SMT placement nozzle is designed for use with YAMAHA YV88X machines. It facilitates the precise placement of electronic components onto printed circuit boards.

Product Overview

Precision SMT Placement Nozzle

This high-performance placement nozzle is engineered for reliable component handling within surface mount technology (SMT) machinery. Designed for seamless integration with YV88X systems, it ensures the consistent and accurate placement of electronic components onto printed circuit boards. It is a critical spare part for maintaining optimal throughput and production quality in high-precision assembly environments.

Technical Details

Part Number	KV7-M7710-A1X
Nozzle Series	61A

Compatibility

Compatible Machinery	YV88X
----------------------	-------

Application

Primary Function

- Surface Mount Technology
- PCB Component Placement
- Automated Electronic Assembly
