

Yard Debris Vacuum Chipper Bagger

This versatile machine is designed for vacuuming, chipping, and bagging yard debris. It features a robust chipping mechanism and a large-capacity collection bag, making it suitable for handling leaves, branches, and other organic materials.

Product Overview

Professional Yard Maintenance Solution

The CJE-1006A is a versatile multi-function machine designed for efficient vacuuming, chipping, and bagging of organic yard debris. Engineered for durability, it features a robust chipping mechanism and a high-capacity collection system to streamline landscaping tasks. With integrated wheels for enhanced maneuverability and an intuitive design, it is an ideal choice for managing leaves and branches in demanding outdoor environments.
