

Yard Waste Vacuum Chipper Bagger

This machine combines vacuuming, chipping, and bagging capabilities into one unit. It is ideal for collecting leaves, twigs, and other debris, chipping branches, and bagging the processed material.

Overview

Yard Waste Management Solution

The CJE-1006A is a high-performance, multi-functional machine engineered for versatile yard waste management. It seamlessly integrates vacuuming, chipping, and bagging capabilities into a single, robust unit designed for professional debris collection and processing. With a focus on durability and ease of use, this equipment facilitates efficient cleaning, composting, and disposal tasks for commercial or heavy-duty residential applications.

Key Features

Operational Highlights

- Powerful engine for reliable performance
- Durable construction for long-lasting use
- User-friendly control interface
- Compact and maneuverable design

Capabilities

Vacuuming, Chipping, Bagging

Design and Utility

Transport and Storage

Yes
