

YBR125 Motorcycle Gear Shift Pedal

This gear shift pedal is designed for YBR125 motorcycles. It is made from durable metal and features a rubber grip for enhanced comfort and control.

Product Overview

High-Performance Gear Shift Pedal

This gear shift pedal is precision-engineered for YBR125 motorcycles to ensure seamless gear transitions and long-term durability. Crafted from high-grade metals including SUS, aluminum, and brass, it offers exceptional resistance to wear and environmental stress. The design features a protective chrome plating, providing both a professional aesthetic and superior corrosion resistance for demanding riding conditions.

Technical Specifications

Construction Materials	SUS, Aluminum, Brass, Alloy
Available Plating Options	Zinc, Silver, Nickel, Chrome, Tin

Manufacturing Processes

Manufacturing Methods

- Stamping
- Stretching
- Bending
- Welding
- Forging
- Casting

Logistics and Quality

Packaging Options

- Neutral packing
- Color box
- Customized brand box

Quality Assurance

100% incoming QC • Mass factory inspection • Technical standard compliant
